

Who is Shakti solar pumps?

With a proven track record, advanced technology, and a commitment to quality, Shakti Pumps stands as the world's leading manufacturer and exporter of solar pumps. Whether you are a farmer, community leader, or industrial manager, Shakti Solar Pumps offer the perfect solution to meet your water pumping needs.

How does Shakti solar work?

The Shakti Solar provides water to remote locations by converting high voltage, direct current from a solar array into alternating current to run a shakti AC motor. When solar power is not available, the controller can manual switch to an alternate three or single-phase AC input such as a grid or generator or inverter from battery, if available.

Are Shakti solar pumps a good choice?

Available in the range of 1 HP-100 HP, Shakti Solar Pumps offer 40% more discharge as compared to other ordinary pumps. Naturally, this makes our pumps the undisputed leader in the pump market. Shakti Pumps has established itself as the world's leading manufacturer and exporter of solar pumps.

What is a Shakti solar controller?

The Shakti Solar controller is a variable speed motor drive designed to run a Shakti three-phase AC motor. The Shakti Solar provides water to remote locations by converting high voltage, direct current from a solar array into alternating current to run a shakti AC motor.

What is a Shakti Solar Drive?

The Shakti Solar drive is designed with the high standard of reliability expected of Shakti products. The controller attempts to drive the pump and motor to deliver water even under adverse conditions, reducing output as necessary to protect the system components from damage, and only shutting down in extreme cases.
