

What is a beam mount bracket?

The Beam Mount bracket is a device for hanging wall-mount stands, lighting fixtures or other items to a support beam without the need for drilling or welding. It saves time and trouble in the field. Simply tighten the bolts to use it.

What are black beam brackets?

The black beam brackets are available in the following popular sizes, among others: In addition to standard beam brackets with or without lip and joist hangers, Wovar now also supplies invisible beam brackets. After mounting, these supports are out of sight, and are therefore also called invisible connectors.

What are beam brackets made of?

The beam brackets are made of galvanised steel and therefore very strong. When building wooden structures, always use high-quality fasteners such as our coach bolts, coach screws, or wafer head screws.

What are custom steel beam brackets?

These custom steel beam brackets can be modified to work in any situation. They can be decorative and structural brackets at the same time. We can make beam hangers, truss plates, joist hangers, post brackets, etc. any size, shape, thickness, hole placement and size of holes, among many other things.
