

What is a solar carport?

A solar carport, developed by INNOVENTUM, is a cost-efficient and well-designed solar PV shade structure for cars. The INNOVENTUM carport unit is designed for two cars with 24 PV panels covering the roof and can be extended to accommodate 4, 6, 8, 10, and more cars.

Which companies have solar carports?

Here are just a few examples: In 2014, Whole Foods constructed 325 kW of solar power at their site in Brooklyn, NY, covering their entire parking lot in solar panels. Lockheed Martin Mission Systems and Training (LM MST) have had solar carports installed at their facility in Clearwater, FL.

Who is solar carports direct?

Turn to none other than Solar Carports Direct to be provided with completely engineered and approved solar carport kits. We are dedicated to giving high-quality and efficient products to individuals, contractors, and solar installers. In addition to that, we also offer training programs regarding the installation process of our solar carports.

How much does a 5 kW solar carport cost?

For a 5kW solar carport, you can expect to pay about \$20,500 before tax rebates, \$2,500 for the frame and about \$18,000 for the solar panels. You can expect to pay about \$14,350 for a 5 kW solar carport system installed after receiving tax rebates. A commercial solar carport costs \$3.45 per watt.

Where are solar carports installed?

Lockheed Martin Mission Systems and Training (LM MST) have had solar carports installed at their facility in Clearwater, FL. Rutgers University generates 60% of their annual energy requirements from an immense array of solar carports -- generating an incredible 8 megawatts of power from their 28 acre parking lot. Why do people install them?

Are solar carports available in Australia?

Solar Carports have been available in Europe, Asia, and the USA for many years. They have been a popular alternative to standard carports or shelters. Solar carports are now available in Australia, although they have been custom made and very expensive in the past, with only a few smaller companies offering them.

The installation of a solar carport is yet another way in which companies can produce and consume energy on site, without compromising the number of parking spaces available. So far, 940.32 kWp of power has been installed in solar carports, avoiding the emission of 668 tons of CO<sub>2</sub>, the equivalent of planting 4,626 trees.

Saule Technologies is a high-tech company that develops innovative solar cells based on perovskite materials. We have pioneered the use of inkjet printing for the production of flexible, lightweight, ultrathin, and

semi-transparent photovoltaic modules.
