On 12 August 2014, ExCo agreed to the allocation of £1m of extra funding to build a newsolar farm for electricity generation on St Helena. The new funding has been identified specifically to support only renewable energy projects, and must be spent in this financial year, 2014/15. ExCo was very supportive of this proposal as solar generated electricity [...]

How much does solar cost in Saint Helena, CA? Based on the latest data from the EnergySage Marketplace, the average Saint Helena, CA homeowner needs a 7.5 kW solar panel system to cover their electric bills. That'll set you back about \$19,191 before incentives. Need a bigger (or smaller) system to offset your

electricity use?

As discussed on our page [Geology of St Helena](#), St Helena was formed by the eruption of two sea-floor volcanoes, some 7-15 million years ago. Originally the island would have been much bigger and dome-shaped (see the diagram on our page [Geology of St Helena](#)). Its current size and shape owes much to the action of water, eroding the land and ...
