

Can a solar panel break?

While it's rare to experience a broken solar panel, they do still break on occasion. The most common reason for a breakage is damage sustained by an object, such as a falling tree branch. In high winds, debris with sharp corners and edges (like a piece of sheet metal) may be picked up and slammed into the panel's surface.

What causes a broken solar panel?

The most common cause of a broken solar panel is cracked glass. If the glass on your solar panel is cracked, you will need to replace it. You can purchase a replacement solar panel online or at a local hardware store. Once you have replaced the broken solar panel, you can now proceed to the next step.

Should I repair or replace my solar panel?

A skilled technician will assess the problem and let you know the cost of repair vs. replacement. Micro-cracks or issues with components or wiring can normally be fixed by a solar panel technician. However, broken or severely cracked panels may need to be replaced.

Can you fix a broken solar panel?

Some companies can fix broken solar panels, but this is costly. To replace a broken solar panel, contact your solar developer - do not attempt to do it yourself. Proper care, maintenance, and regular inspections can help prevent your solar panels from breaking. [Do Solar Panels Break Often?](#)

Can a crack on a solar panel affect performance?

Spotting a crack on your solar panel might send you into a spiral if you just purchased them. Fortunately, most cracks won't impede your panel's performance. A more severe crack could reduce its overall output. Minor cracks might not make any difference at all. Modern solar panels tend to be built with a protective casing.

Do you have problems with your solar panels?

Nearly seven in 10 owners had had no problems with their solar panels in our survey of over 2,000 owners.\* The most common - and most serious - problem owners face is with the inverter.
