

How can BECO's new solar power plant help Somalia?

Because Somalia struggles with a lack of electricity and high electric costs, BECO's new solar power plant has the potential to positively impact many people's lives. When it opened, the power plant had the capacity to produce 8 MW.

How much electricity does Somalia have?

Despite the widespread use of generators, Somalia has only 106 MW of power nationwide, according to the United States Agency on International Development. The World Bank reported in 2018 that 64% of Somalis didn't have access to electricity.

How much power does BECO produce in Somalia?

Currently, BECO produces 35 MW of power for eight cities, which is much less than its demand of 200 MW. Many Somalis avoid using electricity in order to avoid the monthly costs as 69% of Somalis are currently living in poverty. Power companies in Somalia heavily rely on imported fossil fuels for diesel-powered generators.

This article provides an insightful overview of the top 10 solar energy system suppliers in Somalia, highlighting their unique offerings and the crucial role of companies in advancing solar solutions.

Go Solar with Altenergy's Solar Systems, in Somalia, including affordable Solar Panel Battery Solutions and more. About Us Alternative Energy is a cutting-edge solar company that offers a comprehensive range of customized, integrated solar solutions and products to meet the diverse energy needs of customers across all sectors.

In many countries, including Somalia, excessive reliance on fossil fuels is a serious concern. Continually, the desire to get relatively cheap energy by mainly burning coal is stronger than the desire to maintain a good state of the environment [[22], [23], [24]].
