

What is Eaton South Africa's Energy Hub?

Eaton South Africa is set to deliver more holistic power solutions, specially designed and tailored to key sectors in the South African economy through its newly launched Energy Hub unit.

What does the South African Department of energy do?

The South African Department of Energy is tasked with the procurement of 3,126 MW of power from gas in the period 2019-2025. This is to be baseload and mid-merit energy generation capacity needed from gas-fired power generation to contribute toward energy security. The Department's "Gas IPP Program" has been initiated through the IPP Office.

What makes the energy hub so compelling?

"What makes the Energy Hub so compelling is that we are able to manufacture most of the components within our local manufacturing premises, in the same location as where the Energy Hub is located," says Eaton South Africa's plant manager and managing director, Godfrey Marema.

How much energy does South Africa use per capita?

Electricity consumption per capita peaked at 4 500 kWh in 2007 before decreasing to 3 200 kWh in 2023 (around 9 times the value of other Southern African countries). Total energy consumption has been decreasing since 2019 (by 2.2%/year). Total oil production has decreased by 7% per year since 2015, reaching 3 Mt in 2023.

Which energy sources are the fastest growing in South Africa?

Opportunities: According to research house BMI, non-hydropower renewables will be the fastest growing source of electricity generation in South Africa between 2019 and 2028. Struggling thermal capacity at Eskom and the government's commitment to REIPPPP contracts suggest good growth opportunities.

What is South Africa's just energy transition (JET)?

In 2021, South Africa's Just Energy Transition (JET) was officially launched during COP26. The International Partner Group (IPG), consisting of the European Union, France, Germany, the United Kingdom, and the United States, made a landmark commitment of US\$ 8.5 billion.

I'd like to receive news and commercial info from Schneider Electric and its affiliates via electronic communication means such as email, and I agree to the collection of information on the opening and clicks on these emails (using invisible pixels in the images), to measure performance of our communications and improve them.

energyhub DC Power. A complete Lithium-ion power solution. Energy Management Control. Controllers that manage inverters, rectifiers, converters and external devices. Hybrid Energy. Micro-grid hybrid solutions.
