

Did Power Africa grant a solar energy project in Liberia?

Power Africa, through the United States Agency for International Development (USAID) awarded grants totaling \$669,330 to five solar energy companies operating in Liberia.

How much solar energy potential does Liberia have?

Liberia has a high and consistent potential for solar energy, with an average level of 1,712 kWh/m<sup>2</sup>/year, which could generate 1,400 to 1,500 kWh/kWp. Some 43% of the land is covered with forests (41,790 square kilometers, World Bank 2015), but this does not affect the solar energy potential.

Why should we scale PUE in Liberia?

Scaling PUE in Liberia is a way to alleviate the energy shortfall and enhance efficiency at the same time. These grants seek to scale sustainable business models to make more PUE products available on the Liberian market, stimulate demand for the products, and test several business models to supply clean energy.
