

What type of electricity is produced in Sweden?

Renewables and nuclear are given as the electricity produced. Energy in Sweden is characterized by relatively high per capita production and consumption, and a reliance on imports for fossil fuel supplies. With 98% of electricity generation coming from renewables and nuclear in 2023, the electric grid is nearing zero emissions.

What percentage of Sweden's electricity comes from renewable sources?

In 2022, more than 60 per cent of Sweden's electricity came from renewable sources. The government's energy policies have also promoted the use of renewable energy. The Electricity Certificate System - a market-based support system for renewable electricity production - is one example.

Does Sweden have a nuclear power plant?

Sweden currently has three nuclear plants with six nuclear reactors in operation. In 2022, some 19 per cent of Sweden's electricity came from wind power. Combined heat and power (CHP) plants - mainly powered by biofuels - accounted for around 9 per cent of the electricity output. Sweden is wise to draw energy from the forest. There's lots of it!

Is solar energy a sustainable technology in Sweden?

The Swedish solar cell market is still limited, with solar energy accounting for around 1 per cent of the total energy generated. In the transition to a sustainable society, wave power may be an important technology in the future, but it is still relatively undeveloped - both in Sweden and abroad.

Does Sweden have a wave power station outside Lysekil?

Sweden has a wave power station outside Lysekil run by Uppsala University. The wave energy research group at Uppsala University study and develop all different aspects of wave energy, ranging from power systems and generators, to hydrodynamical modelling, and environmental impact of wave energy parks.

How does Sweden use energy?

In Stockholm, the body heat from commuters passing through Stockholm Central Station is used to heat a nearby building, and in the southern town of V&#228;xj&#246;, there are passive high-rises. More than half of the energy used in Sweden comes from renewable energy sources. Find out more about Sweden's energy use.
