

# The big scam of installing photovoltaic panels

Are solar panels a scam?

One of the first signs of a potential scam is unsolicited approaches or door-to-door sales. A reputable solar panel company does not typically use these tactics and instead is more likely to rely on referrals or marketing campaigns. As we mentioned before, another red flag is excessive discounts or too-good-to-be-true offers.

Are 'fake' solar companies a scam?

Beware of any company asking you to make a big deposit before they have completed their installation. This is one of the most common ways 'fake' solar companies have targeted consumers - whereby they take a hefty deposit and then never turn up to carry out the installation. This is common solar scam.

How do I avoid solar scams?

Here are some of our recommendations for avoiding solar scams: The saying &quot;there's no such thing as a free lunch&quot; applies when shopping for solar! If you see ads on social media or have a door-to-door salesperson stop by your home and share special programs that pay you to go solar, they're likely, not legitimate.

Are solar panels free?

As far as actual free solar panels go, there are some small programs in places, like the Solar for All program in Washington D.C., geared toward low-income households that offer modestly-sized solar panel systems for free. Very few homeowners will be able to qualify for these low-income solar programs. How much will solar panels cost you? 2.

Is my solar panel installer going out of business?

If you're not sure whether your solar panel installer has gone out of business, and a cold caller is insisting they are taking over, don't take their word for it. In this instance, it turned out to be a scam. Instead, check your original installer's website and try the contact details you were given when your panels were installed.

Should I get more solar panels?

As you might expect, the more solar panels you need, the higher the cost of going solar. However, getting too few solar panels may not cover enough energy usage, especially if you plan to get an electric vehicle or use a heat pump for more efficient heating and cooling. So, you want to make sure you have a large enough system.
