

Brooklyn Microgrid, New York, New York. 1,389 likes &#183; 1 talking about this &#183; 2 were here. This is a page dedicated to the development of a cleaner, more efficient, distributed energy powered...

Brooklyn Microgrid (BMG)[1] is a pilot project based-on Blockchain technology. In this blockchain-based project, citizens can buy and sell locally produced solar PV power from one another. The project started in early ...

In Brooklyn, LO3 Energy has teamed up with Siemens to create a pilot microgrid using blockchain technology. Residents with solar panels can sell excess energy back to their neighbours, in a peer-to-peer transaction which ...

Desarrollada en el barrio de Brooklyn, Nueva York, en Estados Unidos, Brooklyn Microgrid llega como un nuevo concepto de energ&#237;a comunitaria, en este, la energ&#237;a es generada, almacenada y comercializada directamente por los miembros de la comunidad, promoviendo un modelo de energ&#237;a limpia m&#225;s resistente y sostenible.. A trav&#233;s de paneles ...

The Science behind Brooklyn Microgrid. Through blockchain technology and our own innovative solutions, we've developed Exergy, a permissioned data platform that creates localized energy marketplaces for transacting energy across existing grid infrastructure.

The Brooklyn Microgrid reimagines the traditional energy grid model, with the concept of a communal energy network. While the utility provider still maintains the electrical grid that ...
