Long term investment if you sell energy to TNB. Sign up with our RE scheme to get a passive income by selling the electricity you generate to us*. This way you will also protect yourself from rising electricity prices in the future. Not only that, your property will increase in value due to the solar system you install.

LSS is a scheme that lets you generate your own electricity via solar PV farm with installed capacity ranging from 1MW to <30MW (for distribution connected solar PV plants), and sell to the grid. This scheme is administered by the Energy Commission and the selection for potential developers will be through competitive bidding.

Has anyone installed TNB solar at your landed either 2-storey terrace, semi-D or bungalow? If yes, I would appreciate if you can share your experience. From the TNB solar website calculator, the concept looks interesting. Say, if your monthly electricity bill with TNB WITHOUT SOLAR is RM350, after solar installation the bill will vary with the solar installation ...

You should not use solar power to cut the first 300-400kwhr of usage as those are subsidized. Why would you want to use solar power to pay for 0.21 per kwhr usage. You should be aiming so that your solar power is paying for the 0.57 per kwhr usage not 0.21 per kwhr usage. More solar panels is not free and you have to pay for it.

KUALA LUMPUR: GSPARX Sdn Bhd, a wholly owned subsidiary of Tenaga Nasional Bhd (TNB) is offering affordable and accessible solar installation packages for residential customers.

TNEC is a multi-disciplinary engineering, design and consultancy company working across the solar energy industry in Malaysia.
