Source: IEA, 2012b. 19 Since April 2013, all public electricity is produced exclusively from gas, when the Cover power station on Tobago started to operate on gas instead of oil. A Unique Approach for Sustainable Energy in Trinidad and Tobago 24 Carbon Intensity of Power Generation

Who owns the energy in Trinidad & Tobago?

In 1994, it divested from its generation holdings on the larger island of Trinidad and now purchases energy from three Independent Power Producers (IPPs): the Power Generation Company of Trinidad and Tobago, which purchased the former T&TEC-operated plants and presently controls 1,386 megawatts (MW) of gas-fired capacity across

Does Trinidad & Tobago need energy subsidies?

Unlike many island nations, Trinidad and Tobago has significant oil and natural gas reserves and is a net exporter of these fuels. However, subsidies for domestic energy consumption have created a fiscal burden on the government that could be reduced through the expansion of alternative transportation fuels, energy efficiency, and renewable energy.

Does Trinidad and Tobago have a power generation capacity?

However, Trinidad and Tobago power generation capacity surpasses its current demand (Inter-American Development Bank, 2015), which provides avenues for energy storage through low carbon H₂, MeOH and NH₃ production directly within the local downstream supply chain.

Will the future carbon factors for electricity generation decrease in Trinidad & Tobago?

A Unique Approach for Sustainable Energy in Trinidad and Tobago 24 Carbon Intensity of Power Generation
It is expected that the future carbon factors for electricity generation in T&T will decrease (in comparison to the current ones)--for three main reasons:
