

Turks and Caicos Islands *visra* moss landing energy storage facility

Does *Visra* have a battery storage facility?

Visra recently completed construction on Phase II of its Moss Landing Energy Storage Facility. The battery system is now storing power and releasing it to California's grid when needed. The 100-megawatt expansion brings the facility's total capacity to 400 megawatts/1,600 megawatt-hours.

When will *Visra*'s Moss Landing battery energy storage project start?

Pending the receipt of CPUC approval, *Visra* anticipates construction on the third phase of the Moss Landing battery energy storage project will commence in May 2022 and will begin commercial operations prior to June 2023. With a robust pipeline of projects, *Visra* plans to grow its zero-carbon *Visra* Zero portfolio to 7,300 MW by 2026.

Does *Visra* own wind power?

In addition, *Visra* is a large purchaser of wind power. The company owns and operates the 400-MW/1,600-MWh battery energy storage system in Moss Landing, California, the largest of its kind in the world.

Does *Visra* zero have a battery project besides Moss Landing?

Visra Zero features three other battery projects in addition to Moss Landing: one already completed in Texas (Upton 2 which is 10MW /42MWh) and two more in California (Oakland, 36.25MW /145MWh and DeCordova, 260MW /260MWh), both of which are scheduled for completion in 2022.

Does Moss Landing have a natural gas plant?

Aerial view of the Moss Landing site, including the *Visra* natural gas plant which the site is historically better known for. Image: LG Energy Solution. *Visra* has previously said Moss Landing Energy Storage Facility could eventually host 1.5GW/6GWh of battery storage, if market conditions make that viable.

What happened to *Visra*'s Moss Landing project?

As regular readers of Energy-Storage.news will know, *Visra*'s Moss Landing project has not had the easiest first few years of operation: between September 2021 and June 2022, both of the first two phases had to be taken offline after separate overheating incidents.

Visra Announces Expansion of World's Largest Battery Energy Storage Facility; ... On January 24, *Visra* announced that it plans to further expand its Moss Landing Energy Storage Facility in Moss Landing, California. The company has entered into a 15-year resource adequacy agreement with Pacific Gas and Electric Company (PG&E) for a new 350 ...
