

What is a cubic modular system?

The versatility of the modular system makes it easy and quick to assemble and install electrical panels as well as to extend and/or modify existing panels - including older enclosures. of standard components. The CUBIC modular system provides numerous possibilities for construction of type-tested panels.

Why should you choose cubic modular?

Whenever the need for a safe and efficient power distribution is needed, the CUBIC Modular system is the answer. The modular thinking behind our signature enclosure system makes it possible to build every type of switchboard solution in the low-power segment, based on several standard parts, without compromising on quality.

Who is cubic?

With this in mind, CUBIC was founded in 1973 based on a unique idea of a modular system for the construction of electrical panels. This idea has since the early start developed CUBIC into a global and recognized partner within electromechanics and with a product range that comprises any type of enclosure.

What is modular system?

The Modular System is extensively tested by leading and independent test laboratories. This ensures a high validity of our assertions and ensures a documentation and independency, on which all stakeholders can rely. The Modular System is verifiable according to the IEC/ EN 61439 standard.

Is the modular system verifiable According to the IEC/EN 61439 standard?

The Modular System is verifiable according to the IEC/EN 61439 standard. IEC/EN 61439 has in the fall of 2014 replaced the previous IEC/EN 60439 standard. The versatility of the Modular System enables constructing an electrical switchboard solution for almost every purpose and industry.

What is a modular busbar system?

The modular system is supplied in parts. Using a relatively few standard parts, it is possible to build enclosures in bespoke sizes and models. CUBIC's type-tested busbar systems consist of standard components and cover a range up to 8750 Amps.
