

# Universal solar bracket installation diagram

How to mount solar modules on a roof?

Mounting diagram There are various possibilities for the arrangement of the mounting system and the modules on the roof. The most common option is to horizontally assemble type TF50+ carrier rails and arrange solar modules vertically. For this reason, any further mounting procedures describe such an arrangement.

How do I install a solar stack module?

Insert the end clamps laterally in the pedestal. The end clamps are attached and then tightened at the height of the module frame. Modules should be installed to the Solar Stack pedestals with the manufacturer approved middle/end clamps. There are different types of clamps available for the module installation.

How do you mount a solar module?

The minimum distance between fastened flat head screws and the edges of rafters and purlins must be three times the flat head screw diameter. Position hanger bolts in the centre of rafters and outside the centre on purlins. \* Values are based on crystalline solar modules, the weight of the mounting system increases with thin-film solar modules.

How do I connect a solar stack module to a pedestal?

Modules should be bonded to the Solar Stack pedestals with the manufacturer approved middle/end clamps. Grounding hardware (as a part of the module clamps) forms secure electrical bonds with both the module and the pedestal, resulting in many parallel grounding paths throughout the system.

Are solar stack roof mounting systems ul 2703 listed?

Solar Stack Roof mounting systems are UL 2703 listed. Standard for safety UL/ANSI 2703, Mounting Systems, Mounting devices, Clamping/Retention Devices and Ground lugs for use with PV modules. Solar Stack systems have been evaluated for module-to-system bonding and mechanical load to the requirements of UL/ANSI 2703.

Who should install a solar panel?

All electrical installation and procedures should be conducted by a licensed electrician or solar contractor. Routine maintenance of a module or panel shall not involve breaking or disturbing the bonding path of the system. All work must comply with national, state and local installation procedures, product and safety standards.
