

Are wind and solar projects competitive in Venezuela?

In general, experts warn that the existing Venezuelan regulatory framework makes wind and solar projects not competitive and this creates additional risks for the development of such energy potential. The severity of all such factors evidence the difficulties to develop a sustainable energy sector in Venezuela.

What is the role of coal in Venezuela's energy mix?

In comparison to oil and natural gas, coal plays a minor role in Venezuela's energy mix, accounting for 0.2% of total energy production and 0.1% of total energy consumption. Venezuela's coal industry has faced challenges such as outdated infrastructure and limited investment, which has affected production.

What type of electricity is produced in Venezuela?

Electricity in Venezuela is predominantly produced from hydroelectricity. Venezuela ranked 11th in the world for oil production in 2016; production has since fallen steeply. The largest oil company is Petróleos de Venezuela (PDVSA). Oil fields in the country include Bolivar Coastal Field, Boscon Field, Maracaibo Basin and Orinoco Belt.

Is photovoltaic energy gaining speed in Venezuela?

That is until a 2016 report by the Scientific Institute Francisco de Miranda emphasized the "technical possibilities and the low cost of photovoltaic energy in the country." Despite a phase of fits and starts, harnessing electricity via solar panels and storing it in batteries is a practice that is picking up speed in Venezuela.

What is the Venezuelan energy framework?

The Venezuelan energy framework Venezuela plays an important role in global energy markets. Along with the rest of Latin American countries, it has evidenced different stages on its energy evolution. The understanding of some relevant facts about this sector is needed to evaluate current conditions and challenges.

How does Venezuela's economic policy affect energy consumption?

Venezuela's restrictive economic policies (Figure 3) have resulted in a decrease in inflation-adjusted GDP per capita, which has led to a decrease in energy consumption (Figure 4). Venezuela has the refining capacity to meet its domestic demand, but the country's refineries are in poor condition.
