

Should Bosnia and Herzegovina use more energy?

Bosnia and Herzegovina could do a lot more to use energy efficiently. Electricity prices are kept artificially low and there is therefore limited incentive to make savings. The country is almost four times as energy-intensive as the average in EU countries and has the highest energy intensity in the Western Balkans.

Is Bosnia and Herzegovina a net exporter of electricity?

Bosnia and Herzegovina (BiH), a country of around 3.5 million people, is currently a net exporter of electricity - the only one in the Western Balkans. More than half of its electricity generation capacity is made up of hydropower, while the remainder is made up of five lignite power plants.

Should Bosnia & Herzegovina cap energy consumption?

To boost energy efficiency and energy savings, it also needs to cap primary energy consumption at 6.5 Mtoe and final energy consumption at 4.34 Mtoe by 2030. In mid-2023 Bosnia and Herzegovina published a draft National Energy and Climate Plan.

Does Bosnia & Herzegovina use natural gas?

Bosnia and Herzegovina does not have its own natural gas extraction so it is dependent on the Beregovo - Horgos - Zvornik import route from Russia via Ukraine, Hungary and Serbia. Gas use in the country is limited by the distribution network which is only present in Sarajevo, Zenica, Zvornik and Visoko.

Will Bosnia and Herzegovina build a new hydropower plant?

As well as new coal capacity, Bosnia and Herzegovina plans a large amount of new hydropower, which is proving even more controversial than the coal plants. In the last decade, more than 100 small hydropower plants have been built, causing widespread public resistance in places like Fojnica, Kruscica and on the Neretvica and Buna.

I've invested in the "Old Town Nest", the first Co-living/Co-working space in Bosnia & Herzegovina. It's also my new home. ? I've always felt that...

Energy (in)dependence of Bosnia and Herzegovina and strategic partnership with the Republic of Croatia - analytic view . 1 SUMMARY . In the period from March 2023 to the beginning of February 2024, data were

collected and surveys and interviews with relevant interlocutors were conducted with the aim of making this analysis.

In March 2018, the first 50 MW Mesihovina wind power station was opened. In the ten months of its operation, it produced 103.5 GWh, equivalent to 0.58% of the total electricity generation in Bosnia and Herzegovina. Given that over 50% of Bosnia and Herzegovina's territory is under forests, energy from wood biomass also has large potential. In ...

Institutions & Energy Policy. Bosnia and Herzegovina (BiH) is a Balkan country that became independent from Yugoslavia in 1992. Since the signing of the Dayton Peace Agreement in 1995, the country has been split in two entities, the Federation of Bosnia and Herzegovina (FBiH) and the Republic of Srpska (RS); in addition, the district of Brcko has a special status.
