

Who is Volterra Energy Group?

Volterra energy group was founded in 2017 as a renewable energy development and investment management group focusing in solar, wind, small hydro, energy storages, and waste-to-energy technologies. Since 2017 Volterra developed solar stations with total installed capacity about 200 MW.

What happened to Volterra Energy Group?

Since 2017 Volterra developed solar stations with total installed capacity about 200 MW. In 2020 Volterra energy group sold the biggest part of its solar portfolio and continues its activities now as an investment company. We focused on sustainable business activity and investing in renewable energy, agricultural, ecological and space projects.

What is the total installed capacity of Volterra development pipeline?

Volterra development pipeline total installed capacity exceeds 300 MW. Volterra energy group provides services to reputable multinational investors on their activity in Ukraine. Our team has combined experience in asset management, land development, construction & engineering, operations, management, legal documentation, and financing.

Will Indonesia see a boom in renewables?

Indonesia has not yet seen a boom in renewables, resulting in fossil fuels meeting its electricity demand growth. The National Energy Policy (NEP) 2014 set a target of 23% of renewables in the energy mix by 2025, however, this target is likely to be reduced to between 17-19% in the revised NEP currently being developed.

How can Indonesia's energy transition be made more equitable and 'just'?

Indonesia's energy transition can be made more equitable and "just" by repurposing coal projects into new more sustainable use, and allocating more renewable projects in most impacted provinces - thus creating opportunities for coal-transition impacted communities, such as job creation and new skill sets.

How much CO2 does South Sumatra emit a year?

Meanwhile, South Sumatra had 1,340 MW of CFPPs, which supplied electricity for the province and neighbouring areas. Altogether, these CFPPs are estimated to emit more than 15 million tonnes of CO₂e annually, matching the level of CMM emissions. Source: Ember

Your retail electricity service will be transferred from Volterra Energy to U.S. Retailers LLC, dba Cirro Energy, in November 2018. Cirro Energy has the resources to provide you with long-term service and value.

There is an international commitment, codified by the Paris Agreement [1], to substantially reduce the use of fossil fuels by 2050 and make the energy sector carbon neutral [2, 3]. This means "a balance between anthropogenic emissions by sources and removals by sinks of greenhouse gases" [1]. However, studies based on extrapolations of past trends have shown ...
