

What photovoltaic panels are available for roof selection

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Which type of roof is best for solar panels?

The best type of roof for solar panels is a south facing roof as they tend to generate the most electricity from solar panels. South facing roof panels see the sun when it is at its most intense for the longest period of time, which is why they generate the most energy.

Can a roof be used for solar panels?

Even a roof that doesn't fit the ideal requirements can still be suitable for solar panels. Solar installers will provide slightly differently advise about the most suitable way to maximise energy generation. They will also recommend additional technologies you can use to boost your supply.

Are solar roof tiles better than solar panels?

Solar roof tiles are also around 40% less efficient than solar panels, which means your annual savings will be lower. You should only get solar tiles if you have the money to spend and don't like the look of solar panels, or if you live in a conservation area or listed building.

What is the best roof pitch for solar panels?

What's the best roof pitch for solar panels? The best roof pitch for solar panels is between 30-40°, but the angle of the roof can fall outside of this range and generate electricity effectively. Solar panels can still absorb sunlight even when horizontal.

What is on-roof solar roofing?

On-roof solar panels make up the most widely recognisable solar roofing system in the UK. The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics.

On-roof solar panels make up the most widely recognisable solar roofing system in the UK. The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing ...
