

# Why not install photovoltaic panels on the roof

Should I install solar panels on my roof?

It's important to consider the pros and cons of solar panels on your roof before you decide if a solar panel installation is right for you. Solar panels offer a compelling mix of environmental benefits and financial incentives. However, the initial costs and practical concerns merit consideration.

Can solar panels be installed on a combustible roof?

In general terms, solar panels should not be installed on combustible roofs unless some form of fire protection can be installed between the panels and the roof e.g. concrete panels or pebble ballast.

### 3. Location of solar panels

Should you re-roof after installing solar?

If you need to re-roof after installing solar, you'll be forced to have the solar company remove the panels in the middle of their life, adding unnecessary cost and complexity. You get too much shade: Consistent shade on your roof, whether from nearby trees or neighboring buildings, is bad news for even the best solar panels.

Do you need a bulky rooftop solar installation?

Luckily, you don't have to choose between a bulky rooftop solar installation or nothing at all. Homeowners have several options to make use of the sun's energy, from backyard solar panels to solar pergolas and beyond. Many of the best unique solar panel placement ideas integrate seamlessly into a home's exterior. Ready to dive in?

Do solar panels need a slanted roof?

You have to position solar panels properly to achieve the highest energy production. The optimal orientation and angle usually require a slanted roof that faces the sun. Some roofs have a unique shape that might not accommodate rigid, flat panels. For those homes, flexible solar panels can be a good workaround.

How do you install solar panels on a roof?

Fitting solar panels to your roof is so easy you might not even require professional help. Effectively, all you need to do is attach solar mounts to your roof and then securely fix the solar panels.
